

Developer Relations Engineer with 10+ years spanning embedded systems, edge computing, web scraping, and developer tooling. Expert-level practitioner in agentic AI systems and harness engineering — building custom Claude Code harnesses, routing open-weight models (GLM-5.2, Kimi Code, DeepSeek, Qwen) via OpenRouter, and shipping multi-agent orchestration in production. Active technical content creator across blogs, video, and live streams.

EXPERIENCE

Zyte
Developer Advocate

- 18+ articles on agentic AI, harness engineering, loop engineering, open-weight model evaluation (GLM-5.2, Kimi Code, DeepSeek, Qwen), MCP servers, RAG pipelines, and web scraping at [zyte.com/author/ayan-pahwa](#)
- Expert practitioner in AI harness engineering — build and configure custom Claude Code harnesses, swap open-weight models via OpenRouter, and ship multi-agent orchestration in production
- Built and open-sourced an MCP server connecting LLMs to real-time web data via Zyte API ([github.com/apscrapes](#))
- Created tutorials on Scrapy, Playwright, and Spidermon for production-grade web scraping and data quality monitoring
- Contributed to [zytelabs/claude-webscraping-skills](#), a collection of Claude AI skills for browser-based scraping automation

Dec 2025 – Present · Remote

SlashData
Developer Advocate & Head of Community

- Founded the Developer Nation community from zero, growing it to over 100,000 developers worldwide through content strategy, partnerships, and events
- Managed strategic partnerships with Keychron, APIWiz, Postman, Google, and other developer-focused brands
- Produced and hosted Developer Nation Broadcast, a monthly podcast series, alongside all webinar and live stream production
- Authored developer survey reports reaching 50,000+ developers globally ([developernation.net](#))
- Built and maintained community tooling: newsletter archive library, link generator, and forum infrastructure

Aug 2022 – Dec 2025 · Remote

Balena
Developer Advocate

- Built getting-started guides, SDK tutorials, and interactive demos for the balena edge-computing ecosystem
- Created video, podcast, and livestream content growing a global community of embedded Linux developers
- Delivered talks at international conferences; ran structured product feedback loops between community and engineering

Sept 2021 – Aug 2022 · Remote

Siemens / Mentor Graphics
Sr. Member of Technical Staff

- Developed software and architecture for automotive ADAS and self-driving systems
- Led the automotive noise cancellation audio team from design through delivery
- Presented products and research at industry conferences; managed customer technical requirements

Apr 2016 – Sept 2021 · Noida, India

HOMELAB

Self-managed multi-node homelab on Proxmox with a Tailscale mesh across VMs and containers, WireGuard exit node, OpnSense firewall, reverse proxy for self-hosted services, and Home Assistant automation. Remote access, subnet routing, and exit node configured across separate physical networks.
