codensolder.com

Developer Relations Engineer with 10+ years spanning embedded systems, edge computing, web scraping, and developer tooling. Active creator of technical content across blogs, video, and live streams, with deep hands-on experience in Agentic AI workflows, Tailscale networking, and self-managed Proxmox infrastructure.

EXPERIENCE

Zyte · Developer Advocate

Dec 2025 – Present · Remote

- Recent work covering Agentic AI, Claude Code, multi-agent orchestration, MCP servers, and RAG pipelines: eight articles published in five months at zyte.com/author/ayan-pahwa
- Built and open-sourced an MCP server connecting LLMs to real-time web data via Zyte API (github.com/apscrapes)
- Created tutorials on Scrapy, Playwright, and Spidermon for production-grade web scraping and data quality monitoring ([video walkthrough](#))
- Contributed to [zytelabs/claude-webscraping-skills](#), a collection of Claude AI skills for browser-based scraping automation
- Produce developer education content across YouTube, LinkedIn Live, podcast, and Twitter Spaces

SlashData · Developer Advocate & Head of Community

Aug 2022 – Dec 2025 · Remote

- Founded the Developer Nation community from zero, growing it to over 100,000 developers worldwide through content strategy, partnerships, and events
- Managed strategic partnerships with Keychron, APIWiz, Postman, Google, and other developer-focused brands, coordinating co-marketing campaigns and developer programs
- Produced and hosted [Developer Nation Broadcast](#), a monthly podcast series, alongside all webinar and live stream production
- Authored developer survey reports reaching 50,000+ developers globally, including the Technical Pulse Report and Developer Wellness Report (developernation.net)
- Built and maintained community tooling: newsletter archive library, link generator, and forum infrastructure

Balena · Developer Advocate

Sept 2021 – Aug 2022 · Remote

- Built getting-started guides, SDK tutorials, and interactive demos for the balena edge-computing ecosystem (blog.balena.io/author/ayan_pahwa)
- Created video, podcast, and livestream content growing a global community of embedded Linux developers
- Delivered talks at international conferences and meetups, and organized hackathons and workshops
- Ran structured product feedback loops between community and engineering, directly informing the roadmap
- Maintained open-source sample projects and community contribution guidelines

SKILLS

INFRASTRUCTURE & HOMELAB

Tailscale WireGuard Proxmox
Home Assistant OpnSense
Reverse Proxy Docker

AI & LLM TOOLING

Claude Code Agentic AI MCP Servers
Ollama LMStudio Open Router
RAG Pipelines Qwen Gemini
Opus / Sonnet LangChain VectorDB
OpenCode Conductor

WEB SCRAPING & DATA

Scrapy Playwright Zyte API
Spidermon PostgreSQL

CORE

Python C Bash Git
Technical Writing Public Speaking
Community Building

HOMELAB

Self-managed multi-node homelab on Proxmox: Tailscale mesh across VMs and containers, WireGuard exit node, OpnSense firewall, reverse proxy for self-hosted services, and Home Assistant automation with remote access and subnet routing across separate physical networks.

TALKS & CONFERENCES

- FOSSASIA Summit, Singapore 2019
- PyCon India 2016 and 2019
- PyCon US 2021
- GDG Dev Fest 2022
- Organizer, India Linux User Group and Hardware Hackers Club, Delhi

MEDIA & PORTFOLIO

- YouTube: Live coding session
- MQTT and the Internet of Conference Badges, Hackaday
- FPV Drones course, Hackaday.io
- Projects on Hackster.io

Siemens / Mentor Graphics · Sr. Member of Technical Staff

Apr 2016 – Sept 2021 · Noida, India

- Developed software and architecture for automotive ADAS and self-driving systems
- Led the automotive noise cancellation audio team from design through delivery
- Presented products and research at industry conferences, and managed customer technical requirements
- Maintained the open-source software stack across multiple automotive product lines

- [Talk slides, SlideShare](#)

SIDE PROJECTS

NOALGOTUBE

Algorithm-free YouTube and RSS aggregator — FastAPI backend, PWA, single Docker deployment. No recommendations, only sources you choose.

YUBIGPG

GPG key generation on air-gapped Tails OS with multi-YubiKey loading, LUKS2 encrypted backups, and Ed25519 touch-policy enforcement.

EDUCATION

Dr. APJ Abdul Kalam Technical University

B.Tech, Applied Electronics & Instrumentation

2012 – 2016 · India
